If the National Association of Broadcasters wants to help their members, they should forget about 04-160 and tell them to be more like XM Radio and provide the content that the listeners want to hear. XM is constantly changing the format and content to meet the needs of their audience and improve the quality of their product. They pay attention to the listener and deliver. You would be doing a great disservice to the american people by supporting petition 04-160. I hope you send them a clear message, and deny their petition. Tell them the best way to protect their market share is to provide listeners with the quality content that they want to hear.

By the way, my XM radio's are the best money I've spent on listening pleasure!
